

Macroeconomic Unit of the Governing Board of the Indirect Tax Authority

# Oma Biltén

## With this issue

The growing trend of indirect tax revenues has continued in April 2017. According to the ITA preliminary report by types of revenues, the gross revenue collection increased by 35,3 million or 6,6% in April. However, due to an increase of refunds in the amount of 11 mill BAM, net collection was higher by 24,3 million or 5,5%. Positive trends in revenue collection in April brought increase in both gross and net cumulative collection. The net effects for the first four months amounted to 32,2 million BAM, representing an increase of 1,9% compared to a net collection in the same period of 2016 (Chart 1). The main generator of revenue growth in the first four months of 2017 was VAT, whose collection increased by 22,6 million BAM compared to 2016. It is necessary to take into account the high amount of unadjusted revenues of 21,5 mil BAM, of which a significant part relates to VAT, so a larger increase in VAT can be expected after adjusting payments with submitted returns. Among the other groups of revenues, the growth was recorded in revenues from customs revenues (6,6 mill) and road fees (7,5 mill), while decline of 9,1 million BAM was recorded in excise revenues.

Analysis of the structure of gross VAT collection shows the positive dynamics in domestic VAT, although it is still in the zone of negative growth. On the other hand, despite modest growth of VAT on imports in April, the cumulative growth of VAT on imports was kept to a high 10,5% (Chart 2).

Dinka Antić, PhD  
Head of Unit

### Table of contents:

Indirect tax reveue projections for the period 2016-2019

Technical design: Sulejman Hasanović, IT expert

### Note for readers:

Due to a longer absence of the key staff in 2017 full articles (analysis, projections) are available only in bulletins in local languages.

## INDIRECT TAX REVENUE PROJECTION FOR THE PERIOD 2017-2020 (baseline scenario)

### I ASSUMPTIONS

- Forecast of macroeconomic indicators by Directorate for Economic Planning (DEP) for the period (presented in March 2017);
- Continuation of harmonization of excise duties on cigarettes with EU standards and the application of the new cut tobacco tax policy<sup>1</sup> ;
- The effects of the application of the Free Trade Agreement between BiH and the EFTA countries in the year 2017;
- The effect of the application of the adoption of the Stabilisation and Association Agreement (SAA) with the EU<sup>2</sup>;
- Current trends in collection of indirect taxes.

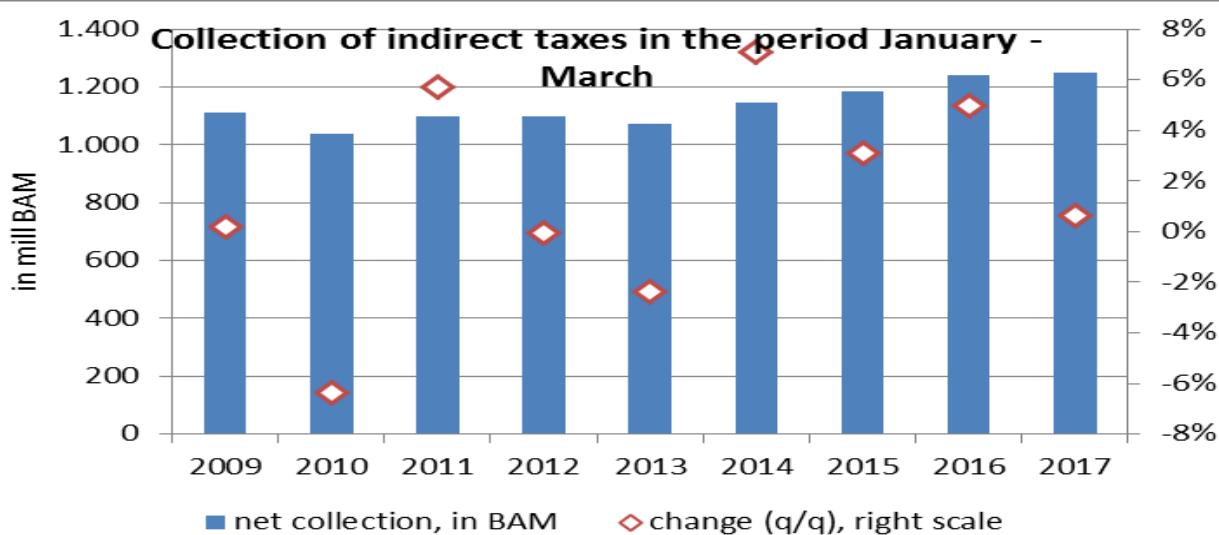

<sup>1</sup> Policy of excise duties on tobacco in 2017 was determined by the Law on Excise Taxes and by Decision of the ITA Governing Board:

- Minimum excise duty on cigarettes: BAM 2,42 per pack (or EUR 61,86 per 1000 pieces)
- Specific excise duty on cigarettes: BAM 1,35 per pack (or EUR 34,51 per 1000 pieces)
- *Ad valorem* excise duty on cigarettes: 42% on RTSP
- Minimum excise duty on fine-cut and other tobacco: BAM 96.80 / kg (or EUR 49,49 per kg)

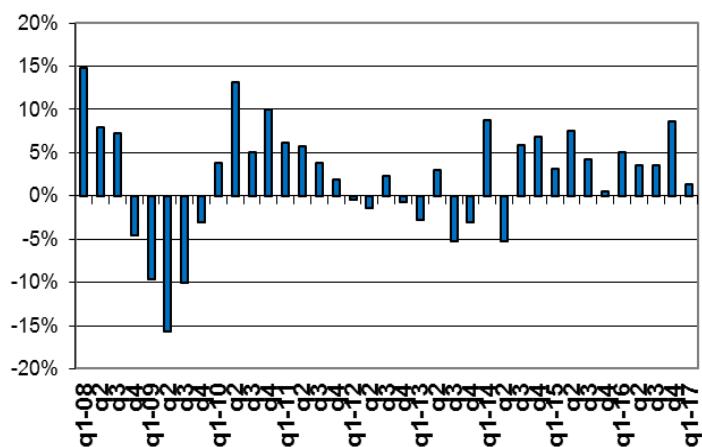

Policy of excises on tobacco in the period 2017-2019 includes continuous annual increase in the specific excise tax on cigarettes of 0,15 BAM per pack, establishing the minimum excise duty on cigarettes (at least 60% of the weighted average price of cigarettes) and the harmonization of specific excise on cut tobacco with excise on cigarettes (at least 80% of the minimum excise tax on cigarettes).

<sup>2</sup> In force as of 1 February 2017

### II CURRENT TRENDS IN COLLECTION
